

CLINICAL EVIDENCE

Equestra's High Bioavailability

Day 1: Plasma omeprazole concentrations following intravenous administration of omeprazole (0.5 mg/kg) and oral administration of Gastrozol omeprazole paste (1 mg/kg) or Equestra omeprazole granules (2 mg/kg). Results are shown as mean and 95% CI.

Day 5: Plasma omeprazole concentrations following oral administration of Gastrozol omeprazole paste (1 mg/kg) or Equestra omeprazole granules (2 mg/kg). Results are shown as mean and 95% CI.

"Equestra in-feed preparation was readily consumed by horses and results indicated that it would be a suitable alternative to oral paste.¹"
